

SECURITY

Emergency shortcut feature (by shaking the phone, or pressing every buttons) to send an emergency location to a contact

When multiple password unlock failures, send picture from the front camera to adress mail

Activate camera and microphone from distance, when pone is lost

The phone sometimes gets too hot.

Password protects individual apps

Could trigger sound alarm, and recieve GPS position and battery percentage only by sending a specific SMS from any number, when phone is lost without internet connexion

PLAY

Phone is swinging on its curved back when laid flat. Need more stability

Notification when friends gets connected to a mutual multiplayer game

Share sound amongst phones to blast music either in stereo, or duplicate

Use the smartphone like a wii remote controller on games

I want the volume to always be reset to XX% when headphones plugged.

Share screen on other smartphone, to play, watch movies, etc...

HANDLE

Volume buttons and power buttons on different sides. Too easy to misclick

Slits and holes more resistant to dust and sand

The back should have more grip on when hold in hands

The logo on the back looks too much like a fingerprint reader

Phone vibrates less when on hard surface (too noisy)

Reversible power plug

COMMUNICATE

Color led on top and on the edge to know if there is any notifications when phone is asleep

Proximity sensor would allow to trigger automatic loudspeaker on calls when phone gets away from ear

Share phone screen during calls

Send odors through phone calls

The phone app should display keyboard by default

Exchange phone number just by nfc another phone
